

ACCIDENT INSURANCE—SUN LIFE FINANCIAL

Have you ever thought about what you would do if you or a family member were accidentally injured or died as a result of an accident? Accidents are unexpected and can strike any member of your family. The costs associated with treatment can mount quickly.

- One in six U.S. residents require medical treatment from an injury each year.¹
- Falls are the leading cause of injuries treated in emergency rooms every year, for people of all ages.²
- Over 40 million Americans visit a physician's office for unintentional injuries each year.³
- The 2007 national economic impact of unintentional injuries amounted to \$684.4 billion.³

How Can Accident Insurance Help?

For covered accidental injuries, fixed benefits are paid directly to you regardless of any other coverage you may have, and you can spend it any way you choose. Benefits are paid according to a fixed schedule that includes benefits for hospitalization, fractures and dislocations, emergency room visits, major diagnostic exams, physical therapy, and more. If you or a covered dependent should die as a result of an accidental injury within 365 days while the coverage remains in force, a death benefit is payable.
